

Your phone system in the Cloud.

Why Jive?

Over 10,000 businesses trust Jive as their Cloud phone system provider. Jive can equip your business with advanced PBX features and dial tone from a single provider for one low, all-inclusive price.

More than just a phone system in the Cloud, Jive provides a robust suite of integrated Unified Communications features including voice, video, data, mobility, fax, and contact center solutions. All designed with your business in mind, Jive's got your communications handled.

Jive's award-winning Dial Plan Editor gives administrators an intuitive drag-and-drop interface, enabling them to easily configure auto attendants, sound clips, wait times, and schedules in real time.

The traditional analog or premise telephone system you've been using costs more than you realize. Proprietary hardware, maintenance, licensing fees, and lack of worker productivity hurt your bottom line. Jive offers the latest communications technology at a dramatically lower cost of ownership than your current setup.

Born in the Cloud

Jive solutions are delivered via Jive Cloud, our hosted services platform. Jive Cloud has industry leading reliability, scales easily to meet your growing needs, and is interoperable with leading CRM, ERP, and business accounting applications. With a fully distributed platform spanning seven SSAE16 certified datacenters across the U.S., get peace of mind knowing your business is on Jive.

Simple. All Jive phones come preconfigured for easy plug-and-play connection to your existing network and bandwidth. All moves, adds, and changes are made from our online portal with intuitive drag-and-drop controls.

Unlimited. Get unlimited voicemail, auto attendants, dial plans, conference bridges, local and long distance, schedules, playlists, messages, and the list goes on. Create exactly what you need, it's all included.

Affordable. No need for large upfront capital expenses. All of Jive's basic and advanced features come standard in one low, per-seat, monthly price. Jive also offers flexible month-to-month service with flexible terms.

1-4 Users 29.95 per device	10-24 Users 23.95 per device	50+ Users 19.95 per device
5-9 Users 25.95 per device	25-49 Users 21.95 per device	

Features

Jive is the last phone system you'll ever need. Jive's advanced UC features connect all your employees wherever they are: in the office, working from home, traveling on business. You can manage the system from any computer, make calls from any desktop or mobile device, and see your call traffic in real-time.

SCHEDULES

Create multiple custom schedules for time-conditional call routing that include open and closed hours and holidays.

INTEGRATIONS

Jive integrates seamlessly with many third-party business applications (e.g., Salesforce, Microsoft Outlook, Microsoft Opera, etc.) and supports click-to-call, integrated directories, screen pops, and other powerful communications features.

CALL ANALYTICS

Get geography-based heat maps, time-of-day histograms, detailed user statistics, and basic call logs with Jive's Call Analytics. You can customize and filter the information you want to see in your call reports.

Customer Experience

Jive takes its customers' experience seriously. Ranked number one in customer satisfaction by numerous industry and technology review sites, Jive is there to help your business succeed.

Dedicated Support. Jive has inhouse customer service and technical support teams waiting for your call. All of our representatives are direct employees, U.S.-based, and available 24x7x365.

Phones. Jive Voice is compatible with SIP-based handsets from leading manufacturers, including Cisco, Polycom, Panasonic, VTECH, and Yealink.
